Re: LETTER OF RECOMMENDATION

I am extremely pleased to offer my recommendation for the use of American Power for lighting projects. They have successfully performed lighting retrofit projects at the numerous Lodi Unified School District sites including (as of this writing); James Areida Education Support Center, Lodi High School and Heritage Elementary School. American Power diligently worked with the local electrical utility to deliver these projects on time, within cost and with the maximum rebate benefit.

With our sincerest appreciation it is an honor to recognize the American Power team of wonderful individuals who efforts have made a difference in our community by installing improved lighting (while de-lamping) during those aforementioned retrofit efforts. Those individuals are genuine community minded professionals. This example of professionalism truly represents American Powers commitment to support the delivery of education and our children's future.

I would like to take this opportunity to personally thank each of Team's American Power members for their support of District's efforts to provide brighter and energy efficient facilities. Thank you for bringing this mission to fruition, safely, on time and without incident.

Very respectfully,
Mitch Slater

Letter of Recommendation

American Power Energy Services Inc.
Lighting and Control Expert
Electrical Commercial Journeyman
Ca DIR License # 139340
Ca C-10 Electric Commercial Contractor
License # 909059

It is my pleasure to recommend Ray Kress and his group for any lighting retrofit projects you may have planned. I have worked with Ray and his team for 2+ years and this last year alone we were able to retrofit 17 of our schools with lighting upgrades. His team was efficient, professional and quick to respond to any issues that may have transpired during these projects. It has been a very beneficial relationship for San Juan School District as we are poised to save substantially in our energy costs. If needed please feel free to call and I would be glad to discuss any of the work American Power has done for us.

Their abilities and knowledge include the following:

- Knowledge of principles and theory of electrical and lighting systems and the fundamentals of electricity;
- Knowledge of principles of large commercial lighting systems, including ability to analyze system operation and recommend modifications;
- Knowledge of the methods, materials, tools and equipment used in the repair of electrical and lighting systems;
- Knowledge of applicable electrical and safety codes;
- Ability to analyze, diagnose and repair system malfunctions or failures;
- Ability to accurately interpret blueprints, schematics, diagrams, instructional manuals and OSHA requirements;
- Ability to apply basic math concepts to compute electrical and lighting loads
- Ability to keep records and prepare reports;
- Ability to establish and maintain effective working relationships with others;

It is my pleasure to recommend American Power for any electrical/lighting project you may have planned.

Sincerely,

Mike Anderson
